

Institute for Sustainable Building

Energy available in Danube Delta
 -Wind energy
 -Solar energy
 There is potential of using water for the energy production as well as providing more of solar energy in order to produce green and sustainable energy

Resources Available in Danube Delta such as:
 - Agriculture
 -Fishing
 -Unique Biodiversity of flora and fauna
 -Forestry
 -Big areas of water and waterlands

Strengths

Unique ecosystem and diversity
 Resources for sustainable growth
 Local expertise
 Unique landscape
 Resources for sustainable production of raw materials

Weaknesses

Bad Infrastructure
 Lack of experience
 Emigration
 Economy
 Illegal fishing
 managing the ecosystem

Opportunities

Managment of the resources
 Innovative opportunities for sustainable production
 Ecotourism
 Job opportunities

Threats

Financial difficulties of fishermen
 Careless tourism
 Too much exploitation
 Destroying the ecosystem and biodiversity
